There's a good reason why pinback buttons have been in style since 1896: these highly-visible, inexpensive gadgets are one of the best ways to help you deliver your message.

Political buttons have been used in the United States since Washington's supporters sported them at his inauguration in 1789. They were simple coat buttons printed with slogans and attached with string.

The first design for a pinback button in the United States was patented in 1896 and featured the first use of a pinback and film to cover the button.

Today, some of the earliest buttons can be worth thousands. A rare button picturing the 1924 Democratic presidential candidates, originally worth pennies, recently sold at auction for \$20,000.

One of the most successful buttons of all time was the "Have a Nice Day" smiley face designed by Harvey Ball in 1963. By 1972, an estimated 50 million smiley face buttons were sold.

About Meadowlark Graphics

When you need your supporters to be visible, you need pinback buttons. We're Meadowlark Graphics, and we're your button people.

- We're a locally run, family business in Topeka, Kansas.
- You get professional graphic design. You're not on your own to figure out the best way to deliver your message. Describe your idea and we'll create a design that makes you look your best.
- Our parts and presses are exclusively made in the USA. Our buttons are union label. We are proud members of the Communication Workers of America local 6401.
- We're fast. Being local has perks. Need buttons overnight? Call us.
- No order is too small. We can produce a single button.
- You can shake up your size. Standard buttons at 2.25 inches are super, but would you prefer a handy 1-inch button to better appeal to youth? Or perhaps an epically huge 3.5 inch button to make your message visible from space? We've got you covered.
- Have buttons, will travel. We love doing make-your-own button booths for kids and adults.
